UTSLIPP AV SO₂ FRA FORBRUK AV
FYRINGSOLJER I NORGE
FORDELT PÅ KOMMUNER

1 SAMMENDRAG

Denne oversikten er laget som et hjelpemiddel til undersøkelsen av SO₂-nivået i norske kommuner. Forbruket av fyringsoljer pr fylke er tatt fra Oljeselskapenes oppgaver over salg m.v., utgitt av Departementet for Handel og Skipsfart. I tillegg har en tatt med oljeraffinerienes forbruk og privat import av fyringsoljer, oppgitt av Statistisk Sentralbyrå. Så langt det har vært mulig har en korrigert for feil som oppstår ved fylkesmessig forskjell mellom faktureringsadresse og leveringsadresse.

Oversikten er utarbeidet for 1970, 1971 og 1972 basert på forbrukstall for de enkelte år. Basert på 1972-forbruket har en også stipulert utslippene i 1973 og 1974, med 3% økning pr år.

Et regnemaskinprogram beregner utslippet pr kommune fra de enkelte fyringsoljetyper, i kategoriene industri og husoppvarming. Utslippet i hver kommune er beregnet direkte proporsjonalt med antall innbyggere i kommunen. Folketallet er fra 1/1 1973, angitt av Statistisk Sentralbyrå

Utslippene fra industrien i et fylke er fordelt jevn utover med befolkningen. Dette bør en være oppmerksom på ved bruk av tallene, idet industrien i et fylke ofte er konsentrert i enkelte kommuner.

2 BEREGNINGSGRUNNLAG

I begrepet "oppvarming" har en samlet følgende kategorier fra Oljeselskapenes salgsstatistikk:

NSB oppvarming
Jordbruk
Husoppvarming
Forsvarets oppvarming
Annet salg
Eget forbruk

I begrepet "industri" har en samlet følgende:

Industriforbruk fra
Oljeselskapenes salgs-
statistikk
Privat import av fyrings-
oljer

Forandringer i fylkenes forbruk på grunn av forskjell mellom faktureringsadresse og leveringsadresse gjelder i kategorien industri. Oljeraffinerienes eget forbruk er ikke inkludert. Dette var i 1971:

Tabell 1: Oljeraffinerienes forbruk av fyringsoljer.

| Oljeraffineri | Fyringsoljeforbruk | Utslipp tonn SO ₂ /år | | |
|---------------|----------------------|----------------------------------|---------|--------|
| | | Fyrings- oljer | Prosess | Totalt |
| Slagen/Valløy | 58.830 tonn Bunker C | 3530 | 470 | 4000 |
| Sola | 20.000 tonn fyr 3 | 700 | 1750 | 2450 |

3 RESULTATER

Tabell 2: Norge totalt 1970. Forbruk og utslipp av SO₂ fra fyringsoljer.

| Oljetype | S kg/l | %S (vekt %) | Industri | | Oppvarming | | Totalt | |
|------------------------------------|-----------|----------------|----------------|----------------------|----------------|----------------------|----------------|----------------------|
| | | | m ³ | tonn SO ₂ | m ³ | tonn SO ₂ | m ³ | tonn SO ₂ |
| Lyspetroleum | 0.81 | 0.04 | 9.847 | 6,4 | 425.738 | 275,9 | 435.585 | 282,3 |
| Gassolje (fyr 1) | 0.85 | 0.4 | 147.303 | 1.001,7 | 620.976 | 4.222,6 | 768.279 | 5.224,3 |
| Dieselolje (fyr 2) | 0.90 | 0.5 | 193.928 | 1.745,4 | 658.941 | 5.930,5 | 852.869 | 7.675,9 |
